Nonfiction. FROM FEATHERS TO IRON--a sequence of lectures through John Clarke--has almost no precedent within the literature of poetic interpretation. It really is straight away a profound revelation of the physics of poetic intelligence and a brilliantly conceived announcement of "the implicate order of the universe." "How hardly ever I stumble upon a very necessary book. Clarke has packed all of it in the following and anyplace you open the pages, jewels, pearls, crowns tumble out. I see illustrations to the Arabian Nights. I've got already picked up and walked off with treasures"--James Hillman.
