Harmonic Superspace by A.S. Galperin

A.S. Galperin

here's the 1st pedagogical creation to harmonic superspace in prolonged supersymmetry by way of the scientists who constructed the method. encouraged through advancements in superstring theory, it presents a scientific therapy of the quantum box theories with $N=2$ and $N=3$ supersymmetry in Harmonic Superspace. The authors current the harmonic superspace strategy as a method of supplying an off-shell description of the $N=2$ supersymmetric theories, either on the classical and quantum levels. Furthermore, they exhibit the way it bargains a different solution to build an off-shell formula of a concept with better supersymmetry, namely, the $N=3$ supersymmetric Yang-Mills theory. Harmonic Superspace makes take place many outstanding geometric houses of the $N=2$ theories, for example, the one-to-one correspondence among $N=2$ supersymmetric matter, and hyper-Kahler and quaternionic manifolds.
